COMPONENTS LIST

To play **Outpost 13: Loop Protocol**, you will need the following physical components:

- **9 Cards (Provided Below):**
  - 7 Location Cards (Draw 6 of the 7 to play)
  - 1 Time & Tracker Card (Time Track, Winning Condition & Loop Reset Rules)
  - 1 Operatives Dossier Card (Characters)
- **4 Operative Tokens:** Sgt. Vance, Pvt. Miller, Rookie Chen, Pvt. Aris (double-sided: normal / wounded). Printable on the last page: cut out each pair and glue back to back.
- **Threat Markers:** 12 small cubes or tokens (printable on the last page). A location can never hold more than 2.
- **Time Marker:** Any coin or token, placed on the Time Track printed on the Time & Tracker Card.
- **Action Dice:** Standard 6-sided dice (D6) for threat rolls and mission checks.

GAME RULES & PHASE STRUCTURE

Core Objective

Pvt. Miller is trapped in a repeating 3-minute time loop. Secure **3 Directives** (each Face-Down location is 1 Directive) by completing location missions before **Time reaches 10**, with **all 4 operatives alive** at the end.

Setup

Shuffle the 7 Location cards and draw 6. Lay them in a row and number them **1 to 6** in draw order. The 7th card is not used this game. Time starts at 0: put the Time marker on 0 of the Time & Tracker Card. Place all 4 operatives in the middle of the table. Start with the Time & Tracker Card Loop 1 side up.

Turn Phase Breakdown

1. **Threat Activation:** Roll 1 D6 and add 1 Threat Token to the location with that number. *If that location is Face-Down, nothing happens (no token, no reroll).*
2. **Assign Operatives:** Place living operatives onto locations. Any number of operatives may **team up** on one location; each makes their own Mission Check.
3. **Mission Checks:** Each operative rolls a D6 vs the Location Target:
   - **Pass:** The mission is progressed and **all Threat Tokens on that location are cleared**. If the card lists a **Reward**, you gain it (once per card per turn, except Medical healing on each pass).
   - **1st Pass:** Card is **Tapped**.
   - **2nd Pass:** Card flips **Face-Down** (secures 1 Directive, no more threats there). With a team-up, both passes can happen in the same turn.
   - **Fail:** That operative suffers the location's **Hazard**.
4. **End of Turn:** Remaining Threat Tokens trigger their location's Threat effect. **Time advances by the total number of Threat Tokens** left on all locations.
5. **Win / Loss:** Win when 3 Directives are secured and **all operatives are alive**. Defeat if Time reaches 10, any location reaches 3 Threats (overrun), Miller dies a second time, or **any operative dies in Loop 2** (there is no more reset to revive them).

Wounds & Death

The 1st Wound flips an operative to its wounded side. The 2nd Wound kills them. A dead operative cannot be assigned or help. Healing flips a wounded operative back to normal. An **Entangled** operative must stay on the same location next turn; teammates can still join them. A Loop Reset frees everyone.

Miller's Loop Reset

If Pvt. Miller dies for **any reason**, the loop collapses and Loop 2 begins: flip the **Time & Tracker Card**, set **Time to 0**, remove **all Threat Tokens**, and **revive all operatives to normal**. Location cards stay as they are (Tapped and Face-Down cards keep their progress). Miller may die deliberately in Loop 1 as a strategy. If Miller dies a second time, the game is lost. In Loop 2 there is no second reset: **any operative death is an immediate defeat**, so keep everyone alive and use **Medical & Decon** to heal.

Clarifications

- **Win check:** at the end of the Mission Checks phase, as soon as the 3rd Directive is secured with all 4 operatives alive.
- **Operative abilities:** Vance +2 on his own roll. Miller rerolls one of his own rolls per turn. Chen gives +1 to one teammate's roll on the same location per turn. Aris lowers the Target by 1 on his own roll.
- **Threat effects** resolve at end of turn, in location order 1 to 6, for every Threat Token still on a face-up location, before Time is counted. An effect that adds tokens can cause an overrun.
- **Overrun:** a location that would hold 3 Threat Tokens is an immediate defeat. Sub-Basement Drainage adds 2 with its effect, so a token left there at end of turn is an overrun. Clear it the turn it appears.
- **Air Duct:** while it holds a Threat Token, Mission Checks on other locations do not count.
- **Medical Door Jam:** tokens here cannot be cleared. They count for Time and are removed at end of turn.
- **Face-Down cards** never receive tokens and are skipped by clockwise moves. A Face-Down Medical card still heals.

RIMLANDS PERIMETER 4+

Razor Wire & Ash-choked Ridge

Mission: Check Deadbolt Click Counts. **Reward:** Time -1.

Hazard: Screaming Stalker Ambush (1 Wound)

Threat: Perimeter Breach (+1 Threat)

CENTRAL COMMS DESK 3+

Radio Desk & Bio-Signal Antenna

Mission: Intercept 4.2Hz Biological Pulse. **Reward:** choose the number for next turn's threat roll.

Hazard: Psychic Feedback Migraine (+1 Threat on this location)

Threat: Doom Beacon (if tokens remain here, add +1 Threat here at the start of next turn, e.g. 1 left becomes 2)

ARMORY & BARRICADE 4+

Munitions Vault & Heavy Door

Mission: Requisition Ammo & Reinforce Door. **Reward:** one operative may reroll a failed check next turn.

Hazard: Weapon Recoil Failure / Jam (1 Wound)

Threat: Munitions Decay (-1 to all operative rolls this turn)

SUB-BASEMENT DRAINAGE 5+

Black Arterial Vines & Drainage Vault

Mission: Sever Vines & Equalize Vacuum

Hazard: Acidic Vine Exposure (1 Wound). Operative is Entangled: can't be reassigned next turn

Threat: Crawler Surge (+2 Threat)

MEDICAL & DECON 3+

Triage Bay & Bio-Scanner

Mission: Treat Wounds & Check Visor. Each pass also heals 1 Wound on any operative. Once Face-Down, an operative here still heals 1 Wound with no roll.

Hazard: Neurological Spasm (no healing this turn)

Threat: Door Jam (no operative may enter this turn; remove tokens here at end of turn)

SECTOR 4 GATE 5+

Breach Point & Primary Hive Barrier

Mission: Secure Breach & Lock Primary Gate

Hazard: Catastrophic Breach Attack (2 Wounds)

Threat: Hive Pounding (each token here counts double for Time)

TIME & TRACKER TRACKER CARD

0	1	2	3	4	5	6	7	8	9	10

Time Track: Move the marker up at end of turn by total Threat Tokens on board. Reaching 10 is defeat.

Winning Condition: 3 Face-Down locations (Directives) with **all operatives alive**.

Loop Reset Rule: When Miller dies for any reason, flip this card: Time to 0, Threat Tokens removed, **all operatives revived**, location cards stay as they are. Miller dying a second time, or any death in Loop 2, is defeat.

OPERATIVES DOSSIER CHARACTERS CARD

Sgt. Vance: Super Soldier (+2 Strength on rolls)

Pvt. Miller: Loop Veteran (Can Reroll once per turn)

Rookie Chen: 4.2Hz Psychic (+1 to friendly roll)

Pvt. Aris: Greenie (-1 Mission Target difficulty)

1st Wound flips token. 2nd Wound kills.

AIR DUCT NETWORK 4+

Ventilation Shafts & Skittering Grates

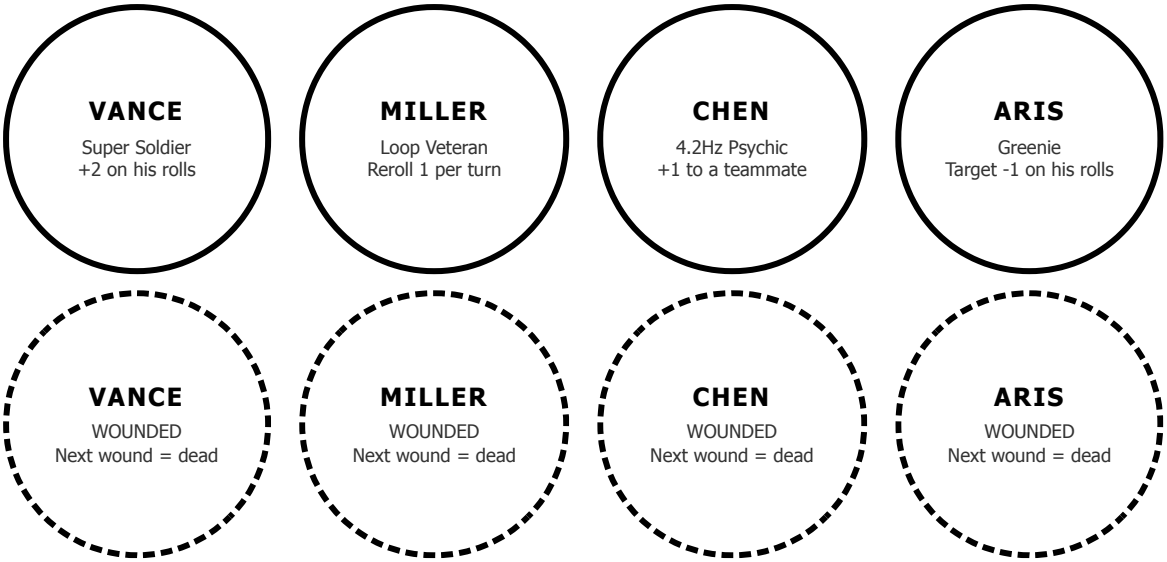

Mission: Clear Vent Grates & Seal Intakes

Hazard: Stalker Drop Ambush (1 Wound)

Threat: Vent Infestation (must be cleared first; at end of turn, move 1 token to the next location clockwise, 6 wraps to 1, skipping Face-Down cards)

TOKENS SHEET

OPERATIVE TOKENS: CUT OUT EACH PAIR AND GLUE BACK TO BACK (SAME COLUMN)

THREAT TOKENS (12)
